

## Hiring for React Developer (Experienced)

### About Dezy It

- We are a team of designers, entrepreneurs and creators all coming together to form a creative community with a common vision of growth and innovation.
- We found our niche in UI/UX by building our expertise in Design Sprints a framework developed at Google Ventures, gathering our learnings and exposure to working with organizations of different scales, geographies and cultures.
- We help companies implement and manage UX Design and Design Thinking processes for scale.
- We unleash companies to scale Design Sprints like never before by our product Dezy It and complimenting services.

### You are a perfect fit if

- You are someone who is empathetic, collaborative and creative.
- You can take ownership of your responsibilities.
- You can explore new areas and take initiatives.
- You believe in continuous learning to achieve excellence.

### About the Opportunity:

A place where you will get exposure to the best development practices that we follow to build highly responsive websites and applications.

You get to work along with our development team on developing our product Dezy It and other projects.

**Location:** Remote

**Experience:** 2 – 5 years

**Probation period:** 3 months

### Salary:

- During probation period: INR 20000 / month
- Post training period: INR 30000 – 35000 / month

### Your usual day at work:

- Participating in architectural, design, and product discussions.
- Taking ownership of product features end to end.
- Following best practices, while designing and querying databases.
- Following best coding practices such as TDD in line with scalable architecture in an agile environment.
- Resolving any problems existing in the system and suggest and add new features to the complete system.

- Implementing CICD for smooth deployment.
- Documenting the project and code efficiently.
- Managing the code and project on Git in order to keep in sync with other team members and managers.
- Maintaining software through the product life cycle including design, development, verification, and bug fixes.
- Collaborating with the front-end developers and other team members to establish objectives and design more functional, cohesive codes to enhance the user experience.

**Skills required:**

- Good hands-on experience with any MVC-based framework and object-oriented and modular design
- 1+ years of hands-on experience with React JS.
- Proficient with APIs, web sockets, service-oriented architectures, and payment services.
- Strong knowledge of RDBMS or databases like MongoDB activities like creation of tables, views, and stored procedures along with query optimization
- Strong knowledge of the creation of RESTful APIs and JSON
- Experience working with Firebase is mandatory
- Experience working with React Native will be an advantage
- Aware of coding standards and best practices to be followed
- Previous startup experience would be great.
- Hands-on DevOps experience.

**Perks and benefits:**

- Experience certificate and letter of recommendation will be provided
- Permanent Work from home opportunity
- Flexible work schedule
- Workcation trips
